

Yufan Zhou

Tel: +86 130-1593-3750 | Email: vannvann@stu.xmu.edu.cn | Page: <https://yufanzhou142.github.io/>

Education Background

Xiamen University | School of Information Communication Engineering | Bachelor

Sep. 2023 - Present

GPA: 3.76/4.00

Academic Ranking: 4/97 (Top 5%)

- **Major Courses:** Mathematical Physics Equations (98), Data Structures and Algorithms (90), Digital Signal Processing A (90), Electronic Circuits I (96), Big Data Machine Learning Algorithm Models and Computer Vision Applications (97), Programming Design Practice (97), System Modeling and Simulation Practice (95), etc.

Research Experience

Academic Publications & Submissions

- Yufan Zhou, et al., Chenyuan Zhang*, Haoran Yang*. "GS³-ICL: Graph-Structured Sparse Selection with Invariance-Consistent Learning for multimodal SER". *ACM International Conference on Multimedia Retrieval (ICMR 2026, CCFB)*. (Accepted)
- Yufan Zhou, et al., Haoran Yang*. "SPF-CMFormer: A Slice-Patch-Frequency Cross-Modality Transformer for Early Autonomic Nervous Dysfunction Detection". *AAAI*. (Under Review)
- Deqing Wang, Jing Zhou, Yufan Zhou, Weiling Li, Xuheng Yang. "一种多模态融合采算通一体水声有线双模通信系统及方法". Invention Patent, No.: CN121690409 B.
- Xiamen University (Yufan Zhou as the first applicant). "面向海底地震仪应用的地声信号采集模块软件V1.0". Computer Software Copyright of the People's Republic of China, No.: 2026SR0292628.

Scientific Research Projects

- **Jun. 2024-Apr. 2026: Underwater Multimodal Data Acquisition, Provincial-level College Innovation Project, Leader**
Targeting signal separation and edge real-time processing in marine and anti-submarine scenarios, project builds an integrated underwater multimodal acquisition system with verified circuits and algorithms, delivering an OBS prototype for low-power high-precision underwater edge sensing. Supervised by Prof. Wang Deqing, FunLab, Xiamen University.
- **Jun. 2025-Present: Multimodal Speech Emotion Recognition**
Establish baselines via unimodal representation, convert tasks into cross-modal representation learning and realize fusion through shared latent space, and adopt temporal modeling to capture emotional dynamics. Focusing on modal missing simulation, contrastive learning and multi-task learning are adopted to boost cross-scenario and cross-lingual performance.

Competitions

- Yufan Zhou (Team Leader). 2025 Higher Education Press Cup National College Mathematical Modeling Contest, Fujian Provincial Division, Second Prize. (Sep. 2025)
- Yufan Zhou (Team Leader). The 8th (2025) National University Embedded Chip and System Design Competition, Chip Application Track, National Final, Third Prize. (Aug. 2025)
- Yufan Zhou. The 12th "Datang Cup" National University Next-Generation Information and Communication Technology Competition, ICT Basic General Knowledge Track, Fujian Provincial Division, Third Prize.
- Yufan Zhou. Second Prize, National Finals, China University Computer Design Competition. (Jul. 2026)

Honorary Titles

- **Academic Scholarship:** National Scholarship (Academic Year 2023-2024, 2024-2025)
- **Honorary Titles & Student Work:** Merit Student of Xiamen University (2023-2024, 2024-2025 Academic Years); Class Organization Committee Member for three consecutive years.

Personal Skills

- **Data Analysis & Programming:** Proficient in Python, C, MATLAB, HuggingFace, Git; capable of reproducing papers, training models, recording experiments.
- **Language Proficiency:** CET-6 (428 points) and CET-4. Able to read original English journals and research papers fluently.
- **Office & Other Skills:** Proficient in LaTeX for academic paper typesetting, Visio for scientific drawing and flowchart design, and skilled in Office software.
